EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Richard Zanzalari on September 21, 2011.

The application has been amended as follows:

Claim 12 is amended as follows:

12. A device for dispensing individual doses of powder from respective pockets of a pair of carriers, the device including:

first and second disc shaped carriers;

a first support for the first disc shaped carrier and a second support for the second disc shaped carrier, said first and second disc shaped carriers each having at least one substantially planar first side surface having an annular array of cavities in which respective pockets are formed and a respective first lidding sheet sealed to the first side surface for enclosing the cavities, wherein said first and second supports are for rotatably supporting the carriers about a substantially common axis;

a mouthpiece through which to inhale an airstream carrying powder from the carriers; a dispensing mechanism for releasing into the airstream the powder of a respective pocket of a supported carrier, said dispensing mechanism comprising an arrangement for axially moving, individually, each pocket from a respective storage position to a respective discharge position; wherein, in said discharge position, said pocket extends outwardly of said cavity; and

an indexing mechanism for rotating the carriers relative to the dispensing mechanism so as to enable powder to be released from different pockets.

Claim 53 is canceled.

Drawings

2. The drawings are objected to because in Figures 5 (a), 5(b), 8, 10, and 13, there is no connection shown between elements in the figure. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each

drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Allowable Subject Matter

3. The following is an examiner's statement of reasons for allowance: The prior art of record does not disclose the particular structural relationship of claim 12 such as a device including first and second disc shaped carriers each with an annular array of cavities, first and second supports for the carriers, and a dispensing mechanism with an arrangement for axially moving, individually, each pocket from a storage position to a discharge position in which the pocket extends outwardly of the cavity.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
